 Minor modification of AS-350/355 bellypan required

FAA - STC approved for *Bell* Jet Ranger / Long Ranger & *Eurocopter* Astar / TwinStar helicopters.

# NOSE MOUNT II

## GENERAL INFORMATION

The Nose Mount is a laptop controlled helicopter camera mount designed to capture a forward looking "flight of the helicopter" point-of-view in which the horizon rolls as the helicopter banks, providing 200 degrees of remotely controlled tilt movement making it ideal for approach, reveal, chase, vertical scenic aerals or fast action sequences. Nose Mounts are used by your Operator and AC and can utilize your camera and lenses or \*Tyler's 35mm camera package.

---

### OPTIMUM CAMERA TYPES

35 & 16MM CAMERAS:                    *Arriflex 35-3, 435, 16SR-2 & 3 & Panavision*  
LARGE FORMAT CAMERAS:            *Panavision 65mm and Beaumonte Vistavision*  
VIDEO CAMERAS:                      All industrial hand-held type, including HDTV

### ADDITIONAL FEATURES

- Five inch color LCD NTSC monitor (PAL also available).
- Optional air-to-ground Microwave video transceiver.
- Digitally controlled frame rates from 6-100 fps, including 29.97 fps.
- Speed/Aperature control.
- Footage counter.
- Iris control.
- Night lights for illuminating the control panels.
- Accessory port for remote zoom control, intervalometer, raindeflector, focus control, etc.

Note: Camera controls operate *Arriflex* type film cameras only. Cameras other than *Arriflex* require their own remote control devices (with a 12 ft. cable) to operate On/Off, Speed, Footage, etc.
